DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, drawn to a shoot and fruit thinner, classified in class 47, subclass 1.01R.
- II. Claims 27-31, drawn to a harvester, classified in class 56, subclass 10.1.
- III. Claims 32-37, drawn to a trellis anchoring system, classified in class 47, subclass 46.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I-III have separate utility such as using separately in the cultivation of grapes or other fruit crops, such as blueberries or hops. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Chad Hinricks and an associate on or about 3 July 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Application/Control Number: 10/014,914
Art Unit: 3643

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
